

## Siskin Hospital for Physical Rehabilitation

CARING PEOPLE. CHANGING LIVES.

For twenty years, Siskin Hospital for Physical Rehabilitation has been serving the needs of patients not only in the greater Chattanooga area, but from eastern Tennessee, northern Georgia, and Alabama as well. The hospital's reputation for quality rehabilitation care, combined with a caring and

compassionate staff, is now drawing patients from other southeastern states and from across the nation.

Focusing on the rehabilitation needs of patients who have experienced traumatic injury or illness, Siskin Hospital offers state-of-the-art rehabilitation programs to treat brain injury, amputation, stroke, spinal cord injury, orthopedics and major multiple trauma. Therapists at Siskin Hospital also treat patients through a wide array of specialty outpatient programs, including lymphedema, osteoporosis, balance and dizziness, and VitalStim.

In addition to the eighty inpatient beds and twenty-nine subacute beds within the hospital's main campus, Siskin Hospital provides rehabilitation services through several offsite outpatient locations, offering conveniently located treatment and programs to meet the needs of patients throughout the Chattanooga metropolitan area and beyond.

To further meet the needs of the disabled community, the hospital has established The Fitness Center at Siskin Hospital, which offers 'Fitness

for Every Body.' The Fitness Center includes specifically designed equipment, well-trained staff and a variety of classes and programs to allow both able-bodied and disabled individuals to work out side by side.

Today, Siskin Hospital remains one of only a few free-standing, independent, not-for-profit rehabilitation hospitals in the nation, and the only one in the state of Tennessee. The level of healthcare offered at Siskin Hospital, along with the professionalism, compassion and caring attitude of

each of the hospital's more than 400 employees is unparalleled. This is best exemplified by the fact that Siskin Hospital is one of a very few hospitals in the United States to have undergone three consecutive reviews by the Commission on Accreditation of Rehabilitation Facilities (CARF) without any recommendations for improvement in service or quality.

"Our motto of 'Caring People. Changing Lives.' is more than just a tag line," states Robert Main, hospital President and Chief Executive Officer. "Siskin Hospital

offers the most comprehensive physical rehabilitation treatment available in the tri-state area. We remain committed to providing the programs and services to meet the needs of patients in the communities we serve, both now and in the future."

▼ This year, Siskin Hospital celebrates 20 years of being Caring. People. Changing Lives.

▲ Siskin Hospital offers a wide array of inpatient and outpatient therapy services, including physical, occupational, speech, vocational services, balance & dizziness, lymphedema, specialized women's services, and much more.

► The Fitness Center at Siskin Hospital offers the unique opportunity for those with a disability to work out alongside those without. It features equipment adaptable for all levels of ability, a spacious layout, and trainers who are knowledgeable about special health concerns and physical limitations.
